

BioLamina website: Links to AppNotes and Instructions

To send as links to customers or collaborators. By application or method.

Contents

1) Quality documents (all products).....	3
2) Laminin and ECM biology	3
Stem cell culture matrices – a practical guide	3
Benefits of the Biolaminin 521 cell culture system.....	3
Laminin protein information (Product, old synonym, chain composition, gene names)	3
Introduction to laminins	3
3) Product sheets.....	3
Biolaminin® 521 grades	3
LN521	3
MX521 / CT521	3
Biosilk 3D network.....	3
4) Infographics	4
Cost infographic	4
5) BioLamina instructions.....	5
Biolaminin	5
Instructions – Coating instructions for Biolaminin	5
Instructions – Culture of human ES and iPS cells.....	5
Video - Single cell ES/iPS cell culture with laminin-521	5
Single cell ES/iPS cell culture with laminin-521 (youtube.com).....	5
Instructions – Culture of mouse ES and iPS cells.....	5
Instructions – Neural Crest differentiation.....	5
Instructions – Weekend-free feeding of hPSC	5
Instructions – Embryoid body	5
Biosilk	6
Free-floating, 96-well.....	6
Attached, 24 well.....	6
6) Methods.....	7
5.1) Gene editing	7
5.2) User format modalities (Scale, Formats).....	7
7) Applications – cell type specific.....	8
6.1) Application overview (human model of all tissues)	8

BioLamina AB - Löfströms Allé 5, SE-17266 Sundbyberg, Sweden

Email: info@biolamina.com

Org nr. 556764-1872, VAT nr: SE556764187201

6.2) Cancer stem cell.....	8
6.3) Eye	8
Retinal pigment epithelial (RPE) cells.....	8
6.4) Liver, Hepatocytes	8
6.5) Neural.....	9
Neural infographic (overview).....	9
Neural crest.....	9
Dopaminergic neurons	9
Brain organoid - Biosilk	9
6.6.) Pancreas	10
6.7) Human pluripotent stem cell (hPSC).....	10
LN521 product sheet.....	10
MX521 / CT521 product sheet.....	10
hPSC culture.....	10
6.8) Mouse pluripotent stem cells (mPSC).....	10
6.9) Skin	10
Skin overview.....	10
Keratinocytes	10
6.10) 3D.....	11
Biosilk 3D network product sheet	11
Brain organoid - Biosilk	11
Instructions – Biosilk	11
Free-floating, 96-well.....	11
Attached, 24-well.....	11

1) Quality documents (all products)

Quality certifications, Safety data sheets, Certificates of analysis (CoA) Animal origin free statements: [Quality documents - BioLamina](#)

2)Laminin and ECM biology

Stem cell culture matrices – a practical guide:

[Guide: Stem cell culture matrices - BioLamina](#)

Benefits of the Biolaminin 521 cell culture system:

[Video: Benefits of the Biolaminin 521 cell culture system - BioLamina](#)

Laminin protein information (Product, old synonym, chain composition, gene names): [Instructions: Laminin protein information - BioLamina](#)

Introduction to laminins

Tissue-specific laminins, Derivation and culture of stem cells and primary cells on specific laminins (Karl Tryggvason), Biorelevant laminins (Kristian Tryggvason):

[Videos: Introduction to laminins - BioLamina](#)

3) Product sheets

Biolaminin® 521 grades

Biolaminin® 521 Cell Culture Substrates Support scientists—from discovery all the way to clinic: [BG-006-07 Biolaminin-521-product-sheet-all-products.pdf \(biolamina.com\)](#)

LN521

Biolaminin® 521 stem cell matrix derivation and expansion of pluripotent stem cells: [app-note-Ln-521.pdf \(biolamina.com\)](#)

MX521 / CT521

Human ES and iPS cell culture On Biolaminin® 521 cell therapy grade:

[AppNote-AN-015-07 CTG-Human-stem-cell-culture-MXCT521.pdf \(biolamina.com\)](#)

Biosilk 3D network

Biosilk 3D biomaterial - more physiological relevant 3D structures for organoid research: [app-note-an-016.pdf \(biolamina.com\)](#)

4) Infographics

Cost infographic

Comparing cost of cell culture on Biolaminins, truncated laminins (E8), EHS extract (Matrigel) and Vitronectin. Biolaminins have the lowest cost/cell, since the average multiplication rate of cells is highest: [cost-infographic.pdf \(biolamina.com\)](http://cost-infographic.pdf(biolamina.com))

5) BioLamina instructions

Biolaminin

Instructions – Coating instructions for Biolaminin

Coating cell cultureware on Biolaminin® substrates:

[IN-001-10_Biolamina-Coating-plates-20240201.pdf](#)

Video - Coating cell cultureware with Biolaminin substrates:

[Video: Coating cultureware with Biolaminin substrates - BioLamina](#)

Instructions – Culture of human ES and iPS cells

Culturing human ES and iPS cells on human recombinant Biolaminin® 521:

[instructions-bl003.pdf \(biolamina.com\)](#)

Video - Single cell ES/iPS cell culture with laminin-521

[Single cell ES/iPS cell culture with laminin-521 \(youtube.com\)](#)

Instructions – Culture of mouse ES and iPS cells

Culturing ES and iPS cells on human recombinant Biolaminin® 511:

[instructions-bl002.pdf \(biolamina.com\)](#)

Instructions – Neural Crest differentiation

Instructions - Neural Crest differentiation from hPSC on Biolaminin® 521:

[IN-004-01_Neural-crest-Instructions.pdf \(biolamina.com\)](#)

Instructions – Weekend-free feeding of hPSC

Weekend-free feeding protocol culture of human pluripotent stem cells on LN521:

[app-note-bl001.pdf \(biolamina.com\)](#)

Instructions – Embryoid body

Embryoid body formation from hPSCs cultured on Biolaminin® 521:

[instructions-bl010.pdf \(biolamina.com\)](#)

Biosilk

Free-floating, 96-well

Instructions - Biosilk® and Biolaminin® free-floating scaffolds in 96-well plate for hPSC culture: [Instructions-IN-012-01-Biosilk-3D-scaffolds-96well-free-floating.pdf](https://biolamina.com/Instructions-IN-012-01-Biosilk-3D-scaffolds-96well-free-floating.pdf) (biolamina.com)

Attached, 24 well

Biosilk 3D scaffolds – for proliferation and differentiation of hPSC:
[instructions-bl01101.pdf](https://biolamina.com/instructions-bl01101.pdf) (biolamina.com)

Video - Generating Biosilk 3D scaffolds for proliferation and differentiation of hPSCs:
[Video: Generating Biosilk 3D scaffolds for proliferation and differentiation of hPSCs - BioLamina](https://biolamina.com/Video-Generating-Biosilk-3D-scaffolds-for-proliferation-and-differentiation-of-hPSCs-BioLamina)

6) Methods

5.1) Gene editing

Efficient gene editing on Biolaminin® 521 substrate:

[AppNote-AN-020-01 Gene-Editing.pdf \(biolamina.com\)](#)

5.2) User format modalities (Scale, Formats)

BioLamina products in research and manufacturing, Biolaminin® matrices for all steps and scale: [App-Note-AN-018-002 BioLamina-products-in-research-and-manufacturing-Modalities.pdf](#)

Large-scale cell production Biolaminin® cell adhesion matrices for cell culture standardization and clinical compliance: [2022-06-01-App-Note-AN-018-001.pdf \(biolamina.com\)](#)

7) Applications – cell type specific

6.1) Application overview (human model of all tissues)

Tissue-specific cell culture matrices. Imitate the natural cell-matrix interactions for improved cell functionality:

[BG-002-7-Applications-infographics.pdf \(biolamina.com\)](https://biolamina.com/app-note-BG-002-7-Applications-infographics.pdf)

6.2) Cancer stem cell

Cancer stem cell culture on human recombinant Biolaminin® substrates:

[app-note-bl01201.pdf \(biolamina.com\)](https://biolamina.com/app-note-bl01201.pdf)

6.3) Eye

Retinal pigment epithelial (RPE) cells

RPE differentiation on Biolaminin® 521 cell culture substrate:

[app-note-RPE.pdf \(biolamina.com\)](https://biolamina.com/app-note-RPE.pdf)

6.4) Liver, Hepatocytes

Hepatic differentiation on human recombinant LN521 and LN111:

[app-note-hepatic.pdf \(biolamina.com\)](https://biolamina.com/app-note-hepatic.pdf)

6.5) Neural

Neural infographic (overview)

Neural cell culture - Imitate the natural cell-matrix interactions for improved cell functionality: [BG-004-06-Biolamina-neural-infographic-1.pdf](#)

Neural crest

Neural crest differentiation on Biolaminin® 521:

[AppNote AN-021-001-Neural-crest.pdf \(biolamina.com\)](#)

Instructions - Neural Crest differentiation from hPSC on Biolaminin® 521:

[IN-004-01_Neural-crest-Instructions.pdf \(biolamina.com\)](#)

Dopaminergic neurons

Dopamine differentiation on human recombinant Biolaminin® 111:

[app-note-bl01301.pdf \(biolamina.com\)](#)

Brain organoid - Biosilk

Brain organoid modeling to study neural development and disease Functional neural 3D cell constructs using Biosilk-Biolaminin® scaffold:

[AN-019-01-Brain-organoids-with-Biosilk-Biolaminin.pdf \(biolamina.com\)](#)

6.6.) Pancreas

Culture of pancreatic cells differentiation and maintenance on laminin substrates:
[app-note-bl003-pancreatic.pdf \(biolamina.com\)](http://app-note-bl003-pancreatic.pdf (biolamina.com))

6.7) Human pluripotent stem cell (hPSC)

LN521 product sheet

Biolaminin® 521 stem cell matrix derivation and expansion of pluripotent stem cells:
[app-note-Ln-521.pdf \(biolamina.com\)](http://app-note-Ln-521.pdf (biolamina.com))

MX521 / CT521 product sheet

Human ES and iPS cell culture On Biolaminin® 521 cell therapy grade:
[AppNote-AN-015-07 CTG-Human-stem-cell-culture-MXCT521.pdf \(biolamina.com\)](http://AppNote-AN-015-07_CTG-Human-stem-cell-culture-MXCT521.pdf (biolamina.com))

hPSC culture

Instructions – Culturing human ES and iPS cells on human recombinant Biolaminin® 521: [instructions-bl003.pdf \(biolamina.com\)](http://instructions-bl003.pdf (biolamina.com))

Video - Watch as cells grow – culture ES and iPS cells on Biolaminin:

Video: Watch as cells grow - culture ES and iPS cells on Biolaminin - BioLamina

Video - Passaging and culture of human PSC on Biolaminin 521:

Video: Passaging and culture of human PSC on Biolaminin 521 - BioLamina

Video - hPSC transition to Biolaminin 521:

Video: hPSC transition to Biolaminin 521 - BioLamina

6.8) Mouse pluripotent stem cells (mPSC)

LIF-independent mouse PSC culture murine stem cell expansion on LN511 application: [app-note-bl002.pdf \(biolamina.com\)](http://app-note-bl002.pdf (biolamina.com))

Instructions – Culturing ES and iPS cells on human recombinant Biolaminin® 511: [instructions-bl002.pdf \(biolamina.com\)](http://instructions-bl002.pdf (biolamina.com))

6.9) Skin

Skin overview

Next generation xeno-free and defined skin cell culture on Biolaminin® 521 (LN521) and Biolaminin 511 (LN511) substrates: [AN-023_001_SKIN_OVERVIEW_1201.pdf \(biolamina.com\)](http://AN-023_001_SKIN_OVERVIEW_1201.pdf (biolamina.com))

Keratinocytes

Xeno-free and defined keratinocyte culture On Biolaminin® 521 and Biolaminin 511 substrates: [App-Note-AN-017_003_Keratinocyte-culture.pdf \(biolamina.com\)](http://App-Note-AN-017_003_Keratinocyte-culture.pdf (biolamina.com))
